

FAUCETS

Faucets

Simply no better faucet available. Made of high quality material with no brass or lead parts in contact with water. Paragon Water offers two designer style faucet bodies to fit any kitchen décor. Each style is available in chrome, white, polished brass or brushed nickel. Each is available with or without air gap and can be used with any filtration system. All faucets are certified to NSF/ANSI Standard 42 for materials and structural safety and all faucets are California Prop 65 compliant.

Tested and Certified by NSF International to NSF/ANSI Std. 42 for material safety and structural integrity.
