

Twist-Lock Drinking Water Filtration Systems

- Lasts up to 12 months dependent upon filter system, water quality and amount of water filtered
- Easy installation; push-on fittings
- ¼ turn; quick change; no mess
- Patented connection protects your replacement cartridge business
- All systems certified by WQA
- Built-in Shut Off Valve replaces filters without turning off cold water line
- ¼ turn shuts off inlet and outlet water channels
- Can be sold with designer faucet and all hardware necessary for installation

Single Stage

- Certified for reduction of chlorine taste and odor
- Improves taste and reduces odors
- Increases clarity of your drinking water
- Helps to protect small appliances that use filtered water
- Lasts up to 12 months dependent upon filter system, water quality and amount of water filtered
- 2,500 gallon capacity

NSF/ANSI Standards. Tested and Certified by Water Quality Association (WQA) against NSF/ANSI Standard 42 for aesthetic reduction of Particulates and Chlorine Taste & Odor.

Dual Stage - All the features of the Single Stage PLUS:

- Certified for reduction of cysts, atrazine, lindane and lead
- 2 stages to optimize filter performance & life
- Lasts up to 6 months dependent upon filter system, water quality and amount of water filtered
- 500 gallon capacity

NSF/ANSI Standards. Tested and Certified by Water Quality Association (WQA) against NSF/ANSI Standard 53 for atrazine, cysts, lead and lindane reduction, and against NSF/ANSI Standard 42 for aesthetic reduction of Particulates and Chlorine Taste & Odor.

Triple Stage - All the features of the Dual Stage PLUS:

- No tanks or drains required to install
- Stages 1 & 2 can be parallel for higher flow rate (1 gpm) twice the flow rate of typical filtration systems
- Compare to bulky, wasteful RO systems:
 - Many RO's waste up to 80% of their filtered water to back-flush
 - Low flow rates on filtered water
- Microbiological Filtration
- Removes 99.99% viruses, Removes 99.9999% bacteria, Removes 99.99% cysts
- Reduces lead, lindane, microbial cysts and atrazine
- Improves taste & clarity
- Lasts up to 12 months dependent upon filter system, water quality and amount of water filtered
- 1,000 gallon capacity

NSF/ANSI Standards. Tested and Certified by Water Quality Association (WQA) against NSF/ANSI Standard 53 for atrazine, cysts, lead and lindane reduction. Tested and Certified by WQA against NSF/ANSI Standard 42 for aesthetic reduction of Particulates and Chlorine Taste & Odor. Tested and certified by WQA to EPA Standard 231 as a Purifier.

Warning: Use only with microbiologically safe water.
